

Science for Better Shea

Venue:

Splendid Hotel (le-splendidhotel.com)

Location:

Ouagadougou, Burkina Faso

Date:

24th-26th October 2011

The INNOVKAR project studies management and use of the shea (*Vitellaria paradoxa*) resources in Africa. Focus is on threats to the natural resource, market constraints, improved quality in production, and new products. The project is a joint effort between partners from nine countries, coordinated by CIRAD and supported by the EU. At this final INNOVKAR conference all new findings and their practical implications will be presented and discussed. Beside the official program there will be possibilities for informal discussions with scientists and presentation of posters.

Please note: that all participants need to cover their own costs for travel, accommodation and subsistence. The size of the meeting is limited. In case of too many interested, the organizers will select participants based on affiliation and stated interests in order to ensure a good mixture of scientists and stakeholders. After the 30th of September, we will confirm participation subject to available room.

To participate in the conference send an e-mail with your Name, Title, Organisation, Address, E-mail, Affiliation, and Interests to [jvind@life.ku.dk](mailto:JVIND@life.ku.dk) no later than the 30th of September 2011.
